

PROFESSIONAL SUMMARY

B.Tech Computer Science and Engineering student with hands-on experience in software development, machine learning, and mobile application development. Skilled in building backend systems using FastAPI, developing cross-platform applications with Flutter, and creating AI/ML solutions using Python. Passionate about solving real-world problems through technology and continuously learning new tools and frameworks

KEY EXPERTISE

Python Machine Learning Artificial Intelligence FastAPI Flutter Deep Learning Data Analysis REST APIs
Docker Git React.js Node.js JavaScript CI/CD Pipeline Vector Database Kubernetes MongoDB
Generative AI Agentic AI Natural Language Processing

EDUCATION

GSFC University

2023 - 2027

B.Tech. - Computer Science & Engineering - School of Technology | CGPA: 6.73 / 10

Parul University (Parul Institute of Engineering & Technology - Diploma Studies), Vadodara

2024

Diploma | Diploma - Computer Science and Engineering | PU | CGPA: 6.69 / 10

Aatman Vidyalaya, Vadodara

2021

10th | GSEB | Percentage: 88.16 / 100

INTERNSHIPS

Gujarat Urja Vikas Nigam Limited | IT / Computers - Software

01 Jun, 2026 - 30 Jun, 2026

Data Analyst Intern (Deep Learning)

Key Skills:

Flutter & Dart Python & FastAPI Deep Neural Networks Deep Learning / TensorFlow Scikit-Learn Isolation Forest
MongoDB & Motor Async Driver Enterprise Security DevOps & Cloud

PowerCortex is an enterprise smart grid operations platform built for utilities like GUVNL. It features a cross-platform Flutter frontend, an async FastAPI/MongoDB backend, and deep learning engines (LSTM & Isolation Forest) for 168-hour demand forecasting, power theft detection, and transformer health monitoring. Hardened with JWT/2FA security, it scales via Docker and Kubernetes for 5,000+ concurrent operators.

Sentiment AI | IT / Computers - Software

01 Dec, 2025 - 01 Jan, 2026

AI-ML Intern

Key Skills:

Python LangChain Generative AI Sentiment Analysis Machine Learning Web Development Text Processing
LLM Natural Language Processing Data Processing AI Automation

Developed an end-to-end real-time Sentiment Analysis web system that classifies textual emotions with confidence scoring. The pipeline automates raw text ingestion, NLP preprocessing, and feature extraction. Leveraging LangChain, Hugging Face, and Llama 2, the system uses custom Python algorithms to deliver instant, automated sentiment insights via a responsive web dashboard.

Arth Technology | IT / Computers - Software

15 Apr, 2023 - 15 May, 2023

Web Development Intern

Key Skills: Web Development Git JavaScript Bootstrap Cross-Browser Compatibility Frontend Development

Designed and built interactive, responsive frontend layouts using HTML5, CSS3, and modern JavaScript. Optimized user experiences across mobile, tablet, and desktop viewports using Flexbox, CSS Grid, and media queries. Maintained clean, reusable codebases, resolved layout bugs, and ensured consistent rendering and cross-browser compatibility across Chrome, Safari, and Firefox.

PROJECTS

PowerCortex

01 Jun, 2026 - 30 Jun, 2026

Mentor: Mr. Krushna K Dhandhal | **Team Size:** 3

Key Skills:

Flutter & Dart Python & FastAPI Deep Neural Networks Deep Learning / TensorFlow Scikit-Learn Isolation Forest
MongoDB & Motor Async Driver Enterprise Security DevOps & Cloud

Project Link: <https://github.com/Chintannn-c/PowerCortex>

PowerCortex is an enterprise smart grid operations platform built for utilities like GUVNL. It features a cross-platform Flutter frontend, an async FastAPI/MongoDB backend, and deep learning engines (LSTM & Isolation Forest) for 168-hour demand forecasting, power theft detection, and transformer health monitoring. Hardened with JWT/2FA security, it scales via Docker and Kubernetes for 5,000+ concurrent operators.

AI-Powered Traffic Accident Severity Predictor

05 Jan, 2026 - 16 Mar, 2026

Mentor: Mrs. Archana Magare | **Team Size:** 3

Key Skills:

Python Machine Learning Deep Learning FastAPI ChromaDB MongoDB SHAP React.js Data Preprocessing
API Integration

Project Link: <https://github.com/yash0622/traffic-accident-predictor>

AI-Powered Traffic Accident Severity Predictor is a React/FastAPI web application for urban planners and traffic authorities. It leverages a dual-inference pipeline combining traditional ML (XGBoost, Random Forest) with custom PyTorch BiLSTM deep learning models. Key features include interactive SHAP explainability, ChromaDB semantic search, live weather integration, and MongoDB audit logging.

PUBLICATIONS / RESEARCH / WHITE PAPERS

Real-Time Driver Drowsiness Detection Using CNN-Based Eye-State Analysis

Research Paper | School of Technology, GSFC University, Vadodara | **Mentor:** Bharti Trivedi | **No. of Authors:** 4

Key Skills:

Deep Learning Convolutional Neural Network (CNN) Computer Vision Image Preprocessing TensorFlow / Keras
Python Binary Classification Model Evaluation

This paper proposes a custom 8-layer Convolutional Neural Network (CNN) for non-intrusive, real-time driver drowsiness detection. Trained on the Driver Drowsiness Dataset (41,793 images), the model utilizes optimized Conv2D/MaxPooling layers and Dropout regularization. The architecture achieves 99.9% accuracy, 1.0 Recall, and 1.0 AUC-ROC, enabling reliable real-time driver fatigue monitoring.

ASSESSMENTS / CERTIFICATIONS

Networking Basics

Provider: Cisco Networking Academy

Key Skills: Computer Networking Network Fundamentals Network Security Cisco Networking

Completed Cisco Networking Academy's Networking Basics course via GSFC University, mastering IP addressing, routing protocols, and network infrastructure.

Python Essentials 2

Provider: Cisco Networking Academy

Key Skills: Python Programming Data Structures Exception Handling OOPs

Completed Cisco's Python Essentials 2 course, mastering Object-Oriented Programming (OOP), custom packages, exception handling, and file I/O operations.

AI Fundamentals with IBM SkillsBuild

Provider: Cisco Networking Academy

Key Skills:

Artificial Intelligence (AI) Fundamentals Machine Learning Basics IBM SkillsBuild Foundations Responsible & Ethical AI

Completed Cisco's AI/ML foundational program, gaining practical knowledge in generative AI, deep learning architectures, and responsible AI system design.

Introduction to Cybersecurity

Provider: Cisco Networking Academy

Key Skills:

Cybersecurity Foundations Threat Detection & Defense Network Vulnerability Assessment Cyber Threat Intelligence
Data Security & Privacy Risk Mitigation

Studied foundational network security, mastering threat detection, vulnerability analysis, and Cisco's threat mitigation frameworks.

Fundamentals of Python Programming

Provider: Parul University (Parul Institute of Engineering & Technology - Diploma Studies)

Key Skills:

Python Programming Data Structures & Algorithms Software Development Foundations Logic Building
Scripting & Automation

Certified in Python programming fundamentals by Parul Institute, mastering syntax, control structures, and programming logic.

Web Designing with Bootstrap

Provider: Parul University (Parul Institute of Engineering & Technology - Diploma Studies)

Key Skills: Bootstrap Framework Front-End Development

Completed a Bootstrap responsive design certificate program at Parul Institute, mastering mobile-first grid systems and UI components.

Responsible & Safe AI Systems

Provider: NPTEL (SWAYAM) - IIT Hyderabad

Key Skills:

Responsible AI AI Ethics Safe AI Systems Model Fairness Bias Mitigation AI Governance
Transparency & Explainability (XAI) Data Privacy

Earned NPTEL Certification in the 12-week 'Responsible & Safe AI Systems' course offered by IIIT Hyderabad. Mastered core concepts in algorithmic bias detection, mitigation, ethical frameworks, and model transparency. Acquired governance strategies to design and deploy compliant, reliable, and fair AI technologies.

SEMINARS / TRAININGS / WORKSHOPS

5 Days Robotics Workshop (Robotic Beginner Course)

19 Dec, 2022 - 23 Dec, 2022

Institute Name: IBA The Robotized World (in association with Parul University)

Key Skills:

Embedded Systems Arduino Programming Microcontroller Programming Control Circuit Design Robotics Fundamentals
Hardware Integration

Completed an intensive 5-day hands-on Robotics training program focused on foundational concepts of automated systems. Demonstrated technical expertise in programming Arduino microcontrollers and designing foundational control circuits. Gained deep technical understanding of robotic hardware mechanics, core algorithms, and component integration.
