

CHINTAN SHARMA

Vadodara, Gujarat, India | +91 8238089207 | sharmachintan585@gmail.com
linkedin.com/in/chintan-sharma-a4a673357 | github.com/Chintannn-c

AI Engineer & AI Agent Developer specializing in LLM orchestration, multi-agent frameworks, and high-concurrency backend architectures. Experience building resilient multi-provider API failover systems (Mistral Large, DeepSeek-R1, Llama 3.3, Gemini Flash), PyTorch deep learning pipelines, and real-time Flutter/FastAPI applications.

TECHNICAL SKILLS

AI & Agentic Systems: Multi-Agent Frameworks, Provider Failover Routing, RAG, Prompt Engineering, Structured JSON Parsing, Intent Extraction

ML & Deep Learning: PyTorch, LSTM, Autoencoders, CNNs, Data Augmentation, Custom Class Weighting, Confusion Matrix Diagnostics

Languages & Frameworks: Python 3.12, Dart, Java, SQL, JavaScript, FastAPI, Node.js, Flutter, Pytest

LLMs & Tools: Mistral Large API, DeepSeek-R1, Llama 3.3 70B, Gemini 2.0 Flash, OpenRouter, MongoDB (Vector Search), Firebase, Docker, Kubernetes, Git

PROFESSIONAL EXPERIENCE

Data Analyst — Deep Learning Models, Gujarat Urja Vikas Nigam Limited

Jun – Jul 2026

- Architected asynchronous FastAPI/MongoDB microservices designed for high-concurrency grid telemetry streams
- Developed multi-model PyTorch pipelines (LSTM, Autoencoder, MLP) for transformer failure prediction and demand forecasting
- Integrated an LLM-powered AI Copilot using intent extraction and live telemetry for predictive maintenance alerts

Python Development Intern, Redspark Technologies

Dec 2024 – Jan 2025

- Built backend modules for IDPS Docs, an internal prototype AI document security platform (Python 3.12, FastAPI)
- Implemented OCR-based document extraction with automated failover logic to reduce manual entry
- Built multi-LLM semantic validation workflows to evaluate document integrity and compliance

App Development Intern, Aarya Softex

May – Jul 2024

- Developed Bliss Bonds, a cross-platform mobile app (Flutter, Firebase OAuth, Cloud Firestore)
- Optimized Firestore queries and reactive state management, reducing sync latency by 35%

PROJECTS

Code Genie — Flutter, Python 3.12, FastAPI, WebSockets, Groq, OpenRouter

- Architected a 4-agent (Planner/Coder/Verifier/Indexer) autonomous coding platform for multi-step feature requests and refactoring
- Engineered a triple-layer failover engine across Gemini 2.0 Flash, Llama 3.3 70B, and DeepSeek-R1 to prevent rate-limit failures
- Built an embedded Flutter IDE with real-time WebSocket state management and terminal execution

StatAudit AI — FastAPI, Python 3.12, Mistral API, DeepSeek-R1, MongoDB

- Built a financial audit platform with enterprise-grade architecture for zero-shot invoice vouching and structured data extraction
- Developed an async statistical sampling algorithm with vendor repetition capping and MongoDB TTL indexing
- Implemented a live telemetry dashboard for latency, health, and rate-limit monitoring across LLM fallbacks

Intelligent Waste Segregation via CNNs — PyTorch, Python, Computer Vision

- Trained a CNN on 25,077 images for organic vs. recyclable waste classification
- Applied augmentation, dropout, and custom class weighting to reach 91% accuracy with balanced precision/recall/F1, verified via confusion matrices

EDUCATION

GSFC University — B.Tech, Computer Science & Engineering

2024 – Present

ITM SLS Baroda University — Diploma, Computer Science

2021 – 2024

CERTIFICATIONS & PUBLICATIONS

Research Publication: AI-Based Intelligent Waste Segregation Using CNNs (91% accuracy, 25,077 images)
